DURGA MOHAN TALADA

PYTHON DEVELOPER | DATA ENGINEER

Hyderabad | +91-9133686825 | durgamohan573@gmail.com | **linkedin.com/in/durga-mohan-talada**

SUMMARY

Python Developer and Data Engineer with 5+ years of experience designing automation frameworks, data pipelines, and workflow orchestration solutions using Python, SQL, Apache Airflow, Snowflake, AWS, and Athena. Proven expertise in automating business workflows and building scalable data processing systems that improve operational efficiency and data quality.

CORE COMPETENCIES

Python Development | Data Engineering | Workflow Automation
ETL & Data Pipeline Development | Apache Airflow Orchestration
Snowflake Data Processing | AWS Cloud Data Solutions
Data Integration & Migration | SQL Development & Optimization
Jira Workflow Automation | Data Quality & Validation
Process Automation | Workflow Orchestration

TECHNICAL SKILLS

Programming: Python, SQL
Data Engineering: Apache Airflow, Snowflake, ETL Pipelines, Data Integration, Data Migration
Cloud Technologies: AWS (S3, Athena, EC2, EMR)
Databases: Snowflake, MySQL, PostgreSQL, Hive, Hadoop
Libraries: Pandas, NumPy
Tools & Platforms: Jira, Jenkins, Linux
Automation & Orchestration: Workflow Automation, Jira Automation, Workflow Orchestration
Core Concepts: Data Structures & Algorithms, Data Validation, Data Quality

PROFESSIONAL EXPERIENCE

Data Analyst | **Zeta Global** Sept 2025 – Present

- Designed and developed **Python-based** automation frameworks to streamline stakeholder-driven workflows, eliminating repetitive manual processes and reducing operational effort and turnaround time.
- Built **Jira-driven** automation solutions to process stakeholder requests, validate inputs from attachments and S3 locations, execute data workflows, and deliver results through automated ticket updates and notifications.
- Developed and maintained **Apache Airflow DAGs** to orchestrate onboarding, data ingestion, validation, and workflow execution, improving pipeline reliability and reducing manual intervention.
- Engineered scalable data processing pipelines using **Snowflake**, **AWS S3**, **Athena**, **SQL**, and **Python**, enabling automated ingestion, transformation, validation, and delivery of large-scale datasets.
- Designed and enhanced identity resolution workflows supporting **MD5 ↔ SHA256**, **Cookie ↔ MD5**, **Company Matching**, **Job Title Matching**, **ACR TV**, and **ACR Ads** use cases, reducing manual query execution and accelerating request fulfilment.
- Led the development and enhancement of the **Circle of Influence** automation framework, leveraging Athena-based processing and audience relationship logic to automate Family, Friends, Colleagues, and Combined Circle audience generation.
- Implemented robust data validation, structured logging, monitoring, execution guards, and failure recovery mechanisms to improve workflow reliability, data quality, and operational efficiency.

Data Analyst | Aptroid Consulting (India) PVT. LTD. Oct 2020 – Aug 2025

- Delivered **end-to-end data integration and migration solutions** using Python, Snowflake, AWS, and SQL, supporting high-volume analytical workloads.
- Designed and automated **ETL pipelines** using Airflow and Snowflake, achieving a **60% reduction in manual effort** and improving operational efficiency.
- Leveraged **AWS services (S3, Athena, EC2, EMR)** for scalable data processing and ad-hoc analytics, improving analysis speed by **~40%** on large datasets.
- Developed reusable **Python-based** data processing and automation frameworks using **Pandas** and **NumPy**, accelerating development cycles by **30%** and improving maintainability across **ETL** workflows.
- Optimized complex queries across **MySQL, PostgreSQL, Hive, and Hadoop ecosystems**, improving query execution time by **25–35%**.

PROJECTS

Jira Automation & Data Processing Framework

- Architected a Jira-triggered automation framework using **Python**, **Apache Airflow**, **Snowflake**, **AWS S3**, and **Athena** to execute end-to-end data processing workflows based on stakeholder-submitted requests.
- Designed a metadata-driven workflow capable of processing inputs from Jira attachments and S3 locations, performing automated validation, ingestion, transformation, and output generation without manual intervention.
- Implemented bi-directional identity resolution pipelines supporting **MD5 ↔ SHA256** and **Cookie ↔ MD5** conversions using Snowflake-based processing and audience mapping logic.
- Built reusable workflow components for **Company Matching**, **Job Title Matching**, **ACR TV**, **ACR Ads**, and audience-processing use cases, enabling rapid onboarding of new automation workflows.
- Developed the **Circle of Influence** processing framework leveraging Athena-based audience relationships and rule-driven segmentation logic to generate Family, Friends, Colleagues, and Combined Circle audiences.
- Engineered execution guards, retry strategies, structured logging, monitoring, and automated Jira status transitions to ensure reliable workflow execution and prevent duplicate processing.

Mockingbird

- Designed and developed automated data ingestion pipelines to extract audience activity signals from AWS and SFTP sources and load them into Snowflake for campaign measurement and reporting workflows.
- Built Airflow-orchestrated ETL processes to consolidate, validate, and process large-scale audience signal datasets, enabling downstream analytics and business reporting.
- Engineered scalable Snowflake-based data processing solutions to support historical analysis and audience insights, improving data availability for analytical use cases.
- Automated high-volume data integration workflows processing over 1 million records daily, reducing processing errors and improving operational efficiency.
- Implemented data matching and validation pipelines using Airflow and Snowflake to ensure data quality, consistency, and reliable signal reporting across multiple source systems.

ACHIEVEMENTS

- Received Star of the Month award twice.
- Received Star Performer of the Quarter award.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering
Lendi Institute of Engineering and Technology | **2016 – 2020**
CGPA: 7.85 / 10.0
